

Look around you, and you'll see that the world is full of things! Some of these things come from **nature**, like the fruit you eat, but others are made by people, like your shoes.

People know how to make many things, but without nature we wouldn't know where to get the materials to make them!

Small babies drink **milk** from their mothers or from a bottle,
and when they grow older they drink milk that comes from
an animal with four legs and two small horns called...
I'm sure you know it!

With milk, two awesome products
are made: cheese and yogurt!
Do you know any others that come
from milk?

Bees are very small animals with wings and black and yellow stripes on their bodies. They fly from one flower to the next and may sting you if you bother them.

Bees live in beehives, where they produce **honey**.
Mmmm, how sweet it is!
