

There are many colors of the rainbow, each one different from the rest. A color on its own is unique and special, but side by side they form the most magnificent and beautiful sight—a rainbow.

Just like the colors of the rainbow, people are unique in their own special way. When people from all around the world come together, they form a sight that is as lovely as a rainbow.

Although people may seem different on the outside, they are all the same on the inside. Our skin has many colors and shades.

Some of us have dark skin and some have light skin. Some skins get nice suntans whereas others get sunburns. But no matter how different our skin may appear, we all have beautiful shades of skin.

Our hair comes in all shapes and lengths, colors and shades. Hair may be black, brown, red, blonde, and many shades of those colors. Some hair is curly and some is straight. No matter how different our hair may be, short or long, dark or light, braided or in ponytails, we all have beautiful, colorful hair.
