

Going over technique

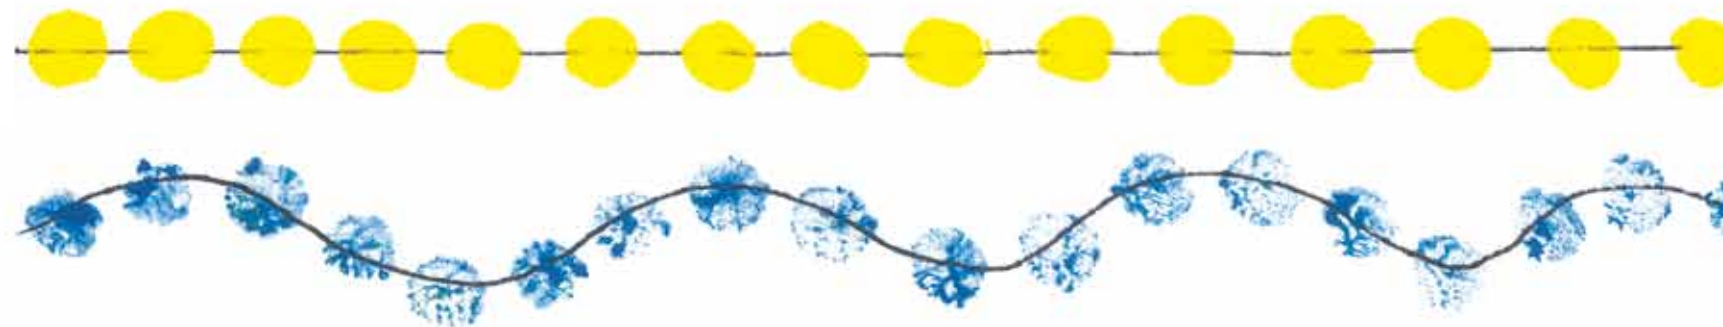

Whenever you draw shapes, you can go over the outline. It doesn't matter if you make it straight or rounded. You simply have to choose, if you want the fingerprints to be very close together, separated or touching. You can also decide whether to make the outline with a single finger or combining them...

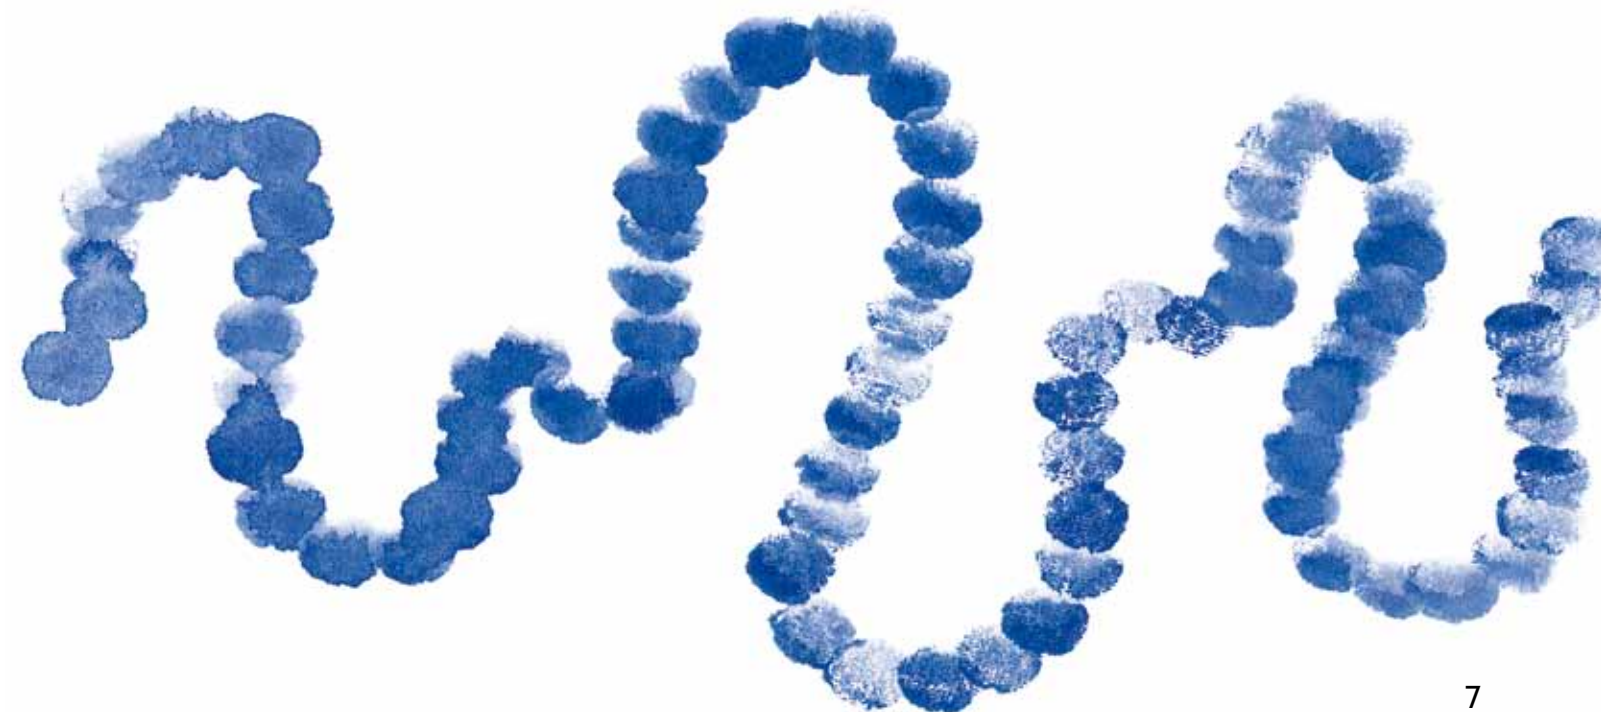

Curved lines

Straight lines

One mark after the other, in contact or without touching

Combining two shapes

A sheep

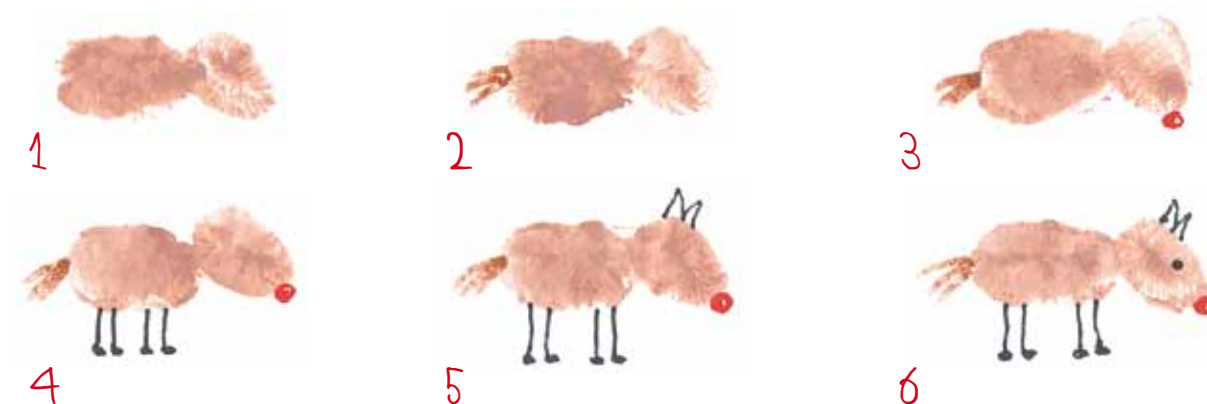

Now that you know how, why don't you combine both shapes? The oval shape of the flattened fingertip and the rounded fingertip. Look at all these new figures. Now you can also paint animals from the side!

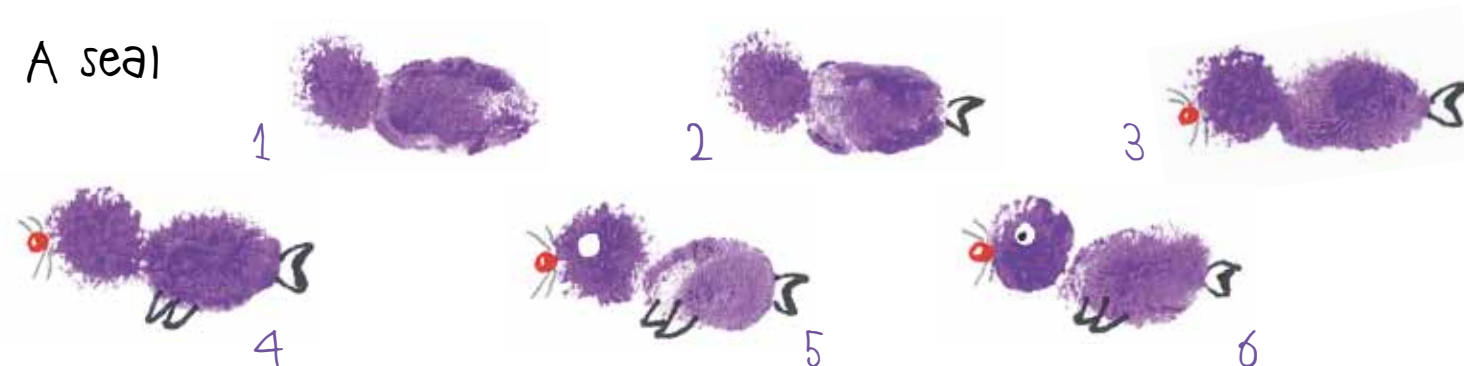

A cat

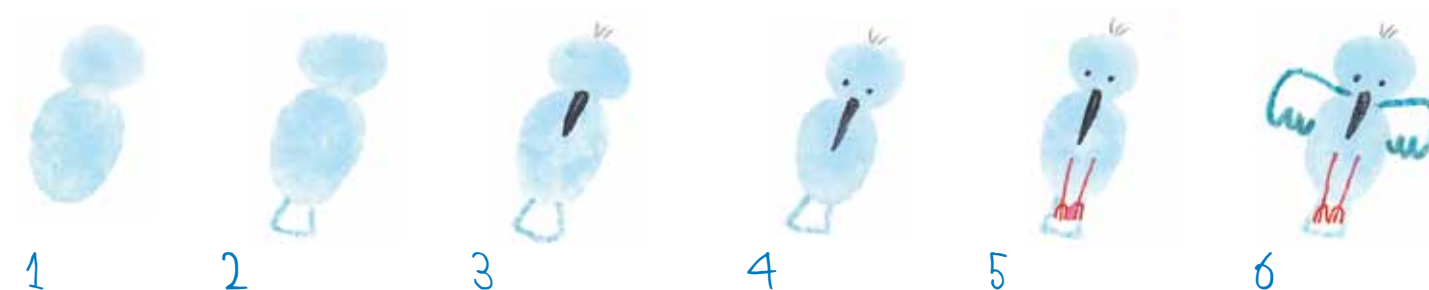

A wolf

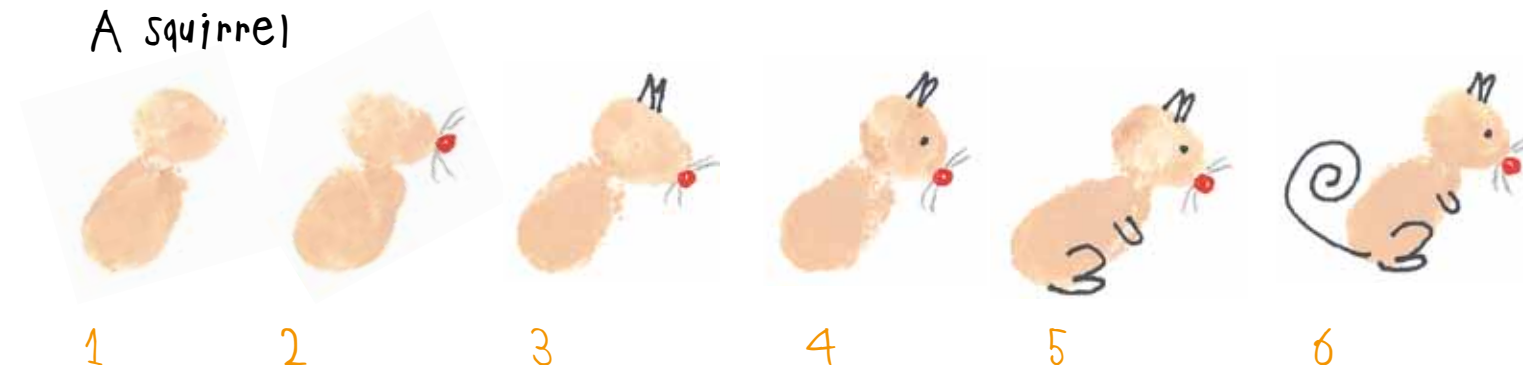

A seal

A flying bird

A squirrel

Flowers and plants

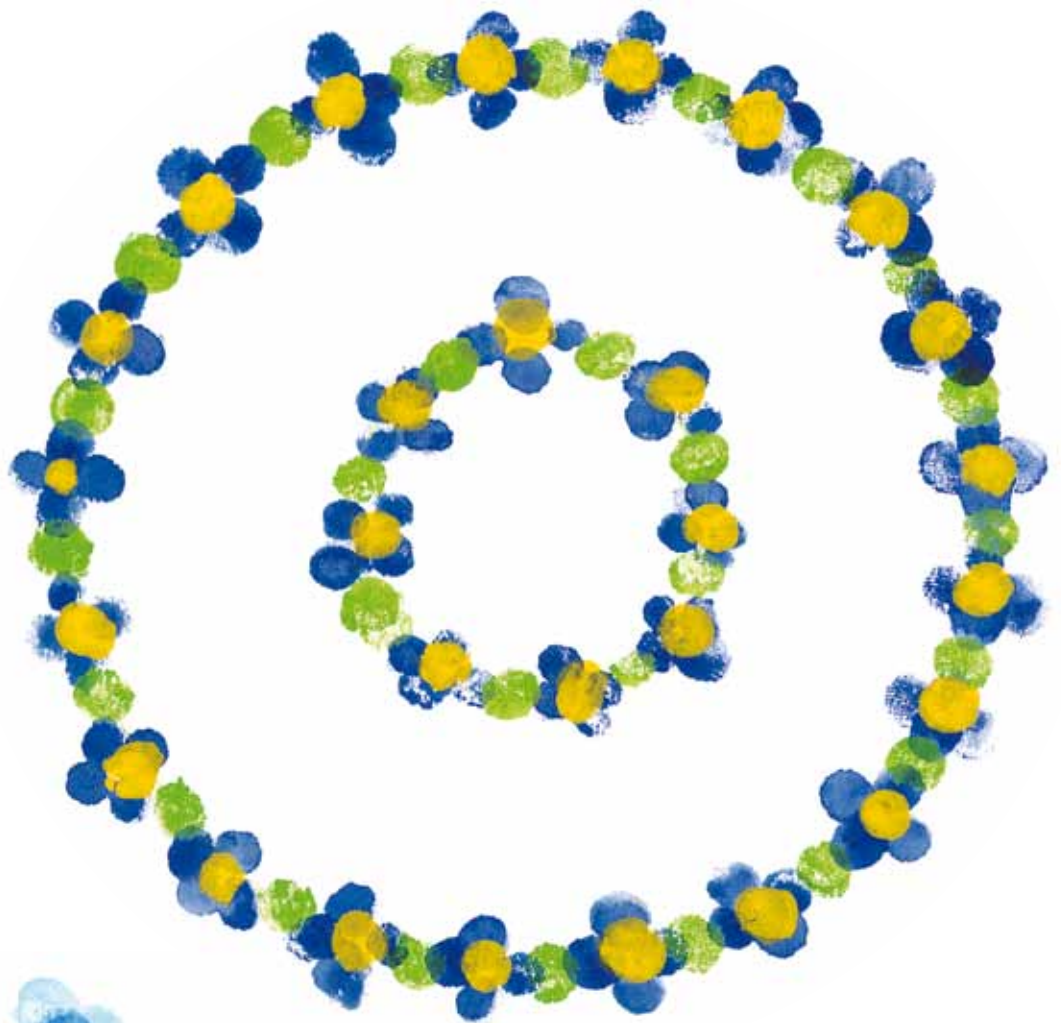

Flowers are so pretty... and they can be so many different colors and shapes! There are large and small flowers, with lots of petals, with tall stalks, planted in pots or placed in a vase. Paint the flower you like the most. Then you can give it to somebody!

A field of flowers

A flower border

Some flowerpots
